ABSTRACT EP 1369803 A2
   In a store server a shopping contribution rate is analyzed for every
   item and every customer by making use of a shopping record of customer.
   When a customer purchases an item using remaining points, a purchasing
   point required for purchasing the same item is reduced based on the
   purchasing point discount rate which has been preset depending on a
   shopping contribution rate.

SPECIFICATION EP 1369803 A2
   This application claims the benefit of Japanese Patent Application No.
   2002-167697, filed June 7, 2002, in the Japanese Patent Office, the
   disclosure of which is incorporated herein by reference.
   The present invention relates to a store server used for management of
   transaction information of customers and management of points of
   customers, and, more particularly, to a point-of-sale (POS) system
   comprising a POS terminal processing transactions of customers and
   Internet shopping or the like.

English Abstract
   A telecommunications reward method provides telecommunications services
   rewards for purchases made by members. The reward method frequently
   updates the member's reward profiles so that rewards are virtually
   instantaneous. The rewards consist of telecommunications services, for
   example long-distance call minutes or cellular telephone air time, and
   are easily redeemed. Apparatus for implementing the method includes a
   high-level control centre and a database management system.

French Abstract
   Un procede pour effectuer des ristournes dans le domaine des
   telecommunications consiste a accorder des ristournes sur les prestations
   de telecommunications en echange d'achats effectues par les abonnes. Ce
   procede permet d'actualiser frequemment la situation de l'abonne en
   matiere de ristournes de sorte que ces dernieres s'effectuent
   pratiquement instantanement. Ces ristournes consistent a offrir des
   prestations de telecommunications, par exemple du temps d'appel
   inter-urbain ou sur telephone cellulaire, et s'echangent facilement. Un
   appareil permettant la mise en oeuvre du procede comporte un centre de
   controle a haut niveau et un systeme de gestion de base de donnees.
